

TIPS TRICKS^{AND} HOW TO...

Use the Dodge, Burn, and Sponge Tools

Dodge Tool

The dodge tool is a great way to lighten colors in your photograph. The more you use this tool in one area, the closer it becomes to white. This is a great way to make a person's teeth or eyes whiter.

Burn Tool

The burn tool is a great method to darken colors in your photograph. The more you use this tool in one area, the closer that area becomes to black. This is a great way to make the iris of an eye darker.

Sponge Tool

The sponge tool is a great method for decreasing the color saturation in a particular area of your photograph. This is a good way to make a portion of your photograph black and white while keeping the rest in color.
