

TIPS TRICKS^{AND} HOW TO...

Adjust the Brightness/Contrast using Adobe Photoshop 7.0

Select "Image" from the menu bar then select "Adjustments" and "Brightness/Contrast."

***Note: you can let Photoshop automatically determine these settings by choosing "Auto Contrast."*

In the "Brightness/Contrast" box, move the bars right and left to adjust your picture's brightness or contrast. You can preview your picture in the workspace as you make the adjustments by making sure the checkbox next to preview is selected.
