

TIPS TRICKS^{AND} HOW TO...

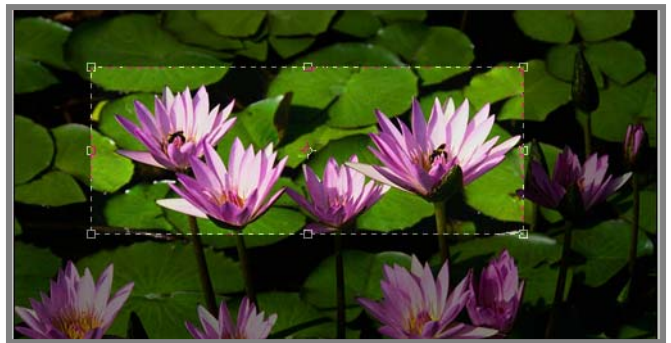

Crop and Rotate your Images

Crop your Image

To crop your image, first select the crop tool from the Elements toolbox.

With the crop tool selected, hold down your mouse and drag the tool across the portion of the picture you would like left in your final product.

After letting go of the mouse, you can continue to adjust your selection using the handles on the selection box.

After making all necessary adjustments, press the "Return" key on your keyboard to crop your selection.

Rotate Your Image

All options for rotating your image can be found by selecting "Image" and then "Rotate". This menu option allows you to rotate your image by direction, degree, or free rotate.
